GREG MILLER NAMED OPERATIONS MANAGER BY JOINING TECHNOLOGIES

East Granby, CT (March 1, 2016) Connecticut-based Joining Technologies, Inc. has announced the promotion of long time employee Greg Miller to the position of Operations Manager at its headquarters facility. In his new position, Miller will oversee all engineering, facilities maintenance and manufacturing personnel, and will have full responsibility for delivering fusion welding, machining and supply chain services to its North American customers, which most notably include aerospace, medical device and automotive OEMs. Miller will report directly to the company's President and CEO, Dave Hudson.

"Greg Miller has been with us for over a decade," said Hudson. "We live by our core values, and Greg's case is an excellent example of a core value we call 'opportunity based on merit'. Greg shows his merit every day in how he engages employees and delivers high value to our customers. I look forward to working closely with Greg as we continue to expand our offerings, grow our customer base and scale the business."

Joining Technologies has long been a national leader in laser welding and cladding, and other metal fusion processes. With the recent addition of a full service machine shop, and the creation of JT Automation, Inc., a wholly owned subsidiary delivering fully integrated manufacturing systems, Joining Technologies continues to establish itself as one of the industry's most innovative and successful precision fusion companies.

About Joining Technologies

Headquartered in East Granby, CT, Joining Technologies, Inc. is an innovator in precision fusion processes, including laser and electron beam welding and laser cladding. The company's extraordinary engineering talent continues to develop economical solutions for joining metal components primarily in the medical device, aerospace, automotive, military, energy, and firearms industries.
